

ABSTRACT

In a channel selection and video recording reservation of television broadcast programs, there is provided a video recording and playback device that applies a program list display device which can visually display a past video recording state and a guide of programs scheduled to be broadcast.

While on a program guide screen 200 program information cells 207 showing individual program information are arranged on a table having a channel attribute on a horizontal axis 201 and a date and hour attribute on a vertical axis 202, a display filter setting screen 250 is provided so as to restrict the program information cells 207 to be displayed, and only the program information cells 207 showing the program information of the programs having a broadcast day of the week designated by a day-of-the-week designation 253 and a broadcast period of time designated by a time designation 254 are displayed on the program guide screen 200.
